We provide dedicated servers and VPS hosting services that can be matched to fit your needs. Whether you are an individual looking for a basic shared hosting package or your small business needs a scalable dedicated web hosting solution, we are willing and able to meet your web hosting needs. Our VPS hosting as a cost-efficient solution comes right in the middle of dedicated and webspace hosting product ranges and provides you with the advantages of both of these types. We use a virtualization solution based on KVM and hardware that corresponds to the latest state of the art. Furthermore you are provided with guaranteed RAM and disk space. Customize your virtual private server to suit your needs and select the operating system (Linux or Windows Server 2012 and Windows Server 2008) of your choice. To manage and administer your virtual machine, you can optionally choose between Parallels Plesk, cPanel/WHM and Webmin. Decide now and rely on high-quality, powerful VPS hosting solutions. Our entire fleet of dedicated servers is 100% managed, so you do not have to worry about running your servers or fixing any problems. What we mean by Dedicated Servers, is that we will take care of the setup of your dedicated web hosting account, troubleshooting with your dedicated server, and everything in between.
