With many years of helping clients with Mortgages, we are able to place client with the best lender for their circumstances in mind. As we are 'whole of market', this allows us to give our clients the best rates in the country. Many of us know the importance of having Life Insurance, it's essential if you have children, have a mortgage or other debit. But not many of us know you can place your life policies in Trust to save on IHT and allow the policy to payout within days rather than after probate has been completed. We advise on this as well as the various critical illness covers available. As a business protection specialist we offer a disaster recovery for personal to our business owners. Businesses are only as good as the people who work in them. From the shop floor up great employees, managers and directors are the people who ensure businesses grow and thrive. These are the people we protect. Yet how many businesses ensure their essential team members are provided with the necessary protection should disaster strike? We understand the importance of insuring essential employees, managers, directors and shareholders, so that they and the business continue to prosper in the event of the unforeseen happening. With years of experience providing the right insurance products to

businesses and individuals across the country, we work to ensure you receive the best product to suit your needs in the quickest possible time. We have been providing expert advice to individuals and British businesses large and small for over 17 years.
