New Forest Outreach Support is a non-profit C.I.C (community Interest Company) that offers a fun packed, educational, and supportive specialised service, focused on children aged 5 and over and vulnerable adults in and around the New Forest. Professionally accommodating everyone's individual needs. Service users can access a range of different support and services from one main hub. We deliver a unique, professional and fun service to children and vulnerable adults, in and around the New Forest. We feel that we are lucky to live in such a beautiful area and would like to make the most out of our environment, giving us the perfect

space to deliver necessary support to everyone who needs it. We offer services from child care, SEN support, sensory sessions, educational resources and visits, pet therapy to play and arts & crafts. We also understand how important social well-being is and encourage this in all of our services. We work closely with elderly individuals and vulnerable adults through our outsourced companionship programme. We are an outreach service as we consider that not everybody is able to drive or be as mobile as others. The reason why NFOS is a Community Interest Company is because some of the community that we work with are on lower income and we strongly believe that everybody should be given the chance to attend/receive all of our services despite their current living situations or circumstances.
