Sculptor Long Ly is originally from Saigon, Vietnam. "I lived happily with my family in Saigon until 1978 when we escaped the communist regime at aged only 8 years old. Along with my family we left for an unknown future on a rickety fishing boat." He then settled in The UK and completed his schooling. Long went on to a variety of jobs but always had art as his passion. Today he has become a unique artist with one of a kind designs. His pieces are made from recycled metal, ranging from pots and pans to plumbing pipes and carpet dividers – his imagination shows no bounds. Daily items that you would not consider art at all have been turned in to stunning creations with Long's ingenuity and skill.
